Deadline for manuscript
submissions:
closed (31 January 2023)

Message from the Guest Editors

Dear Colleagues,

Mathematical models are used routinely in many areas of Science and Engineering as the standard way of providing conceptual frameworks to understand nature and provide solutions to real-world problems. It has been only recently that this methodology, beyond the classical statistical studies, has started to be used in medicine and specifically in cancer research. Many concepts of potential relevance in cancer have been proposed coming from mathematical approaches ranging from evolutionary dynamics concepts to adaptive and metronomic therapies.

The purpose of this Special Issue is to present recent advances in mathematical oncology and applications of mathematical models. Editors invite authors to submit original research articles and high-quality review articles on the development, analysis, and simulation of mathematical models based on ordinary differential equations, dynamical systems, partial differential equations, discrete and stochastic approaches, and others.

an Open Access Journal by MDPI

Informatics, De Montfort
University, The Gateway,
Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
