Mathematical Modeling, Data Analysis and Artificial Intelligence in Interdisciplinary Research

Guest Editors:

Prof. Dr. Petr Nikitin
Department of Data Analysis and Machine Learning, Financial University under the Government of the Russian Federation, 125167 Moscow, Russia

Prof. Dr. Sergey Korchagin
Department of Data Analysis and Machine Learning, Financial University under the Government of the Russian Federation, 125167 Moscow, Russia

Prof. Dr. Sergey Grigoriev
Professor, Department of Informatics, Management and Technology, Moscow City Pedagogical University, 129226 Moscow, Russia

Deadline for manuscript submissions:
closed (30 September 2023)

Message from the Guest Editors

Dear Colleagues,

This Special Issue is devoted to researching mathematical modeling, data analyses, and artificial intelligence (integral parts of scientific research), especially if they are interdisciplinary, their us in applied interdisciplinary tasks and research, as well as application methods, predictive analytics, machine and deep learning, reinforcement learning; the development of recommendation systems in the fields of education, psychology, and social and economic sciences; agriculture, physics, chemistry, and other sciences. In addition, articles related to theoretical and computational studies of mathematical modeling and artificial intelligence emphasizing models, optimization, data analyses, and machine learning are welcome.

Special Issue

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and
Informatics, De Montfort
University, The Gateway,
Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.
Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
