Deadline for manuscript submissions:
closed (15 September 2023)

Message from the Guest Editor

Dear Colleagues,

This Special Issue focuses on publications in the field of innovative development processes and mathematical modeling in industry, associated with the formalization of continuous and discrete systems, cyclical development study, global optimum production efficiency achievement in the context of the triple helix of interactions with the study of development traps, similarity and difference assessment applied to the functioning of innovative systems in different countries, regions and types of economic activity based on the use of modern mathematical methods of data processing and visualization, revealing latent patterns, including using computer analysis.

Dr. Aleksey I. Shinkevich
Guest Editor

Special Issue

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University, The Gateway, Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.
Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
