Electrical Engineering, Beihang
University (BUAA), Beijing, China

Deadline for manuscript
submissions:

closed (28 February 2026)

Message from the Guest Editor

This Special Issue focuses on research on intelligent control for nonlinear systems within the realm of mathematics. It aims to explore the theoretical underpinnings and practical applications of intelligent control methods in addressing the challenges posed by nonlinear systems. Potential authors are invited to contribute research that combines advanced mathematical techniques with innovative control strategies to improve the performance and stability of nonlinear systems. The issue will cover topics such as optimization algorithms, dynamical systems theory, and control theory applied to nonlinear systems.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
