Summability and Convergence Methods

Guest Editors:

Prof. Dr. Francisco Javier Pérez Fernández

Department of Mathematics,
Faculty of Sciences, University of
Cádiz, 11510 Puerto Real, Spain

Dr. María C. Listán-García

Department of Mathematics,
Universidad de Cádiz, Apdo. 40,
11510 Puerto Real, Spain

Prof. Dr. Soledad Moreno-Pulido

Department of Mathematics,
College of Engineering, University
of Cadiz, 11519 Puerto Real,
Spain

Deadline for manuscript
submissions:

31 January 2025

Message from the Guest Editors

This Special Issue focuses on novel and original results related to summability and convergence methods such as Cesàro summability, statistical convergence, lacunary summability and matrix methods. Papers that address recent developments in Boolean and effect algebras are also welcome.

The aim of this Special Issue is to present recent developments in summability and convergence methods, including, but not limited to, the following:

- Multiplier Convergent Series
- Statistical convergence
- Cesàro summability and convergence
- Lacunary convergence
- Boolean and Effect algebras
- Abelian theorems
- Tauberian theorems

The framework employed typically encompasses Banach spaces but can be as general as topological groups or specialization in finite dimensional normed spaces.

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
