Message from the Guest Editors

Dear Colleagues,

As a generalization of other notions like cellular automata or Kauffman networks appeared in the last quarter of the twentieth century, the notion of Boolean networks has undergone a special development in the last decades. This is mainly due to its applications in Science and Engineering.

In this sense, several research groups of mathematicians are working and obtaining relevant results in this area that can be applied in other fields. We invite them to submit their latest research to our Special Issue, “Boolean Networks Models in Science and Engineering”, in the reputed journal Mathematics.

We hope to collect novel and interesting papers, both theoretical and practical, in this field. Submissions are welcome presenting new theoretical results, new algorithmic as well as new models or applications in Science and Engineering.

Potential topics include, but are not limited to:

- Dynamics of Boolean network models
- Algorithms, methods, and software for the study of Boolean network models
- Boolean network models applied in science and engineering

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
