closed (1 March 2023)

Message from the Guest Editor

This Special Issue aims to present the recent studies in parallel processes modelling under intuitionistic fuzzy uncertainty. The modelling tools include—but are not limited to—the apparatus of Generalized Nets (GN) introduced by Prof. Krassimir Atanassov as an extension of Petri nets.

For this Special Issue, the authors are invited to publish their new theories, concepts or applications related to the modelling of parallel processes under intuitionistic fuzzy uncertainty. The studies can present new research works in the area of generalized nets, intuitionistic fuzzy sets and other concepts related to them.

an Open Access Journal by MDPI

Editor-in-Chief

School of Computer Science and
Informatics, De Montfort
University, The Gateway,
Leicester LE1 9BH, UK

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
