Trends in Game Theory and Its Applications

Guest Editors:

Prof. Dr. Encarnación Algaba

Dr. Stefano Moretti

Prof. Dr. Marina Núñez

Prof. Dr. Agnieszka Rusinowska

Deadline for manuscript submissions:
closed (31 October 2023)

Message from the Guest Editors

Dear Colleagues,

This Special Issue is devoted to the European Meeting on Game Theory—SING16. These scientific meetings have a long tradition in Europe, and their origins date back to the early 1980s. It can now be said that the European Meetings on Game Theory, better known as SING Meetings, are the main congress on game theory held in Europe, bringing researchers from all over the world together. It is a forum where new results, advances and trends in game theory are presented and disseminated.

We would like to invite participants in SING16 to consider this Special Issue to submit their original papers—both those presented during the congress and other relevant papers. Of course, we also invite any other game theorists who have not participated in SING16 to submit their original papers to this Special Issue.

Therefore, the main aim of this Special Issue in *Mathematics* is to gather a collection of papers that reflect the latest results, advances and trends in game theory and its applications, particularly, but not limited to, those areas covered by the SING Meetings.

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.
Journal Rank: JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
