

Special Issue

Advances in Artificial Intelligence: Models, Optimization, and Machine Learning, 2nd Edition

Message from the Guest Editors

Nowadays, artificial intelligence is an integral part of scientific progress. Various methods have been used to solve problems that were considered challenging until now. AI has the potential to offer tools for learning, knowledge discovery, and decision-making that can outperform human abilities and can be used in a large number of application domains. This Special Issue will focus on recent theoretical and computational studies of artificial intelligence, with a focus on models, optimization, and machine learning. Topics include, but are not limited to, the following:

- Deep learning and classic machine learning algorithms;
- Neural modeling, architectures, and learning algorithms;
- Neuro-symbolic models and explainable artificial intelligence models;
- Spiking neural networks: theory and applications;
- Hebbian learning and other biologically plausible neural models;
- Optical neural networks;
- Biologically inspired optimization algorithms;
- Algorithms for autonomous driving;
- Reinforcement learning and deep reinforcement learning;
- Probabilistic models and Bayesian reasoning;
- Adaptive systems;
- Intelligent agents and multiagent systems.

Guest Editors

Prof. Dr. Florin Leon

Dr. Mircea Hulea

Dr. Marius Gavrilescu

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
