### Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to provide an overview of all relevant aspects of bone trauma surgery and bone regeneration:

- Preclinical testing of solutions for the enhancement of bone fracture repair based on stem cells and growth factors;
- Novel techniques and upgrade of current techniques for bone healing;
- Proposal of guidelines in bone trauma surgery;
- Results of ongoing clinical studies of novel devices and procedures for enhanced bone repair;
- Bone and implant related infection diagnostics and treatment protocols;
- Cartilage repair and regeneration techniques;
- Biomechanical studies and simulations;
- Finite element analysis.

Authors are also encouraged to submit their technical notes, surgical strategies and decision making, clinical outcome studies, patient satisfaction studies, and systematic reviews and meta-analyses for novel surgical techniques. Case series and case reports of high quality will be considered for publication.

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
