### Message from the Guest Editor

Dear Colleagues,

In the never-ending battle of microbes versus antimicrobials, microbes appear to be winning, with the pipeline of novel antimicrobials nearing its end. Due to the inappropriate use of antibiotics, antimicrobial resistance (AMR) is a rising threat, having caught the attention of international and national organizations. Reducing antimicrobial resistance while maintaining the efficacy of antimicrobials is the goal, and the instigation of antimicrobial stewardship programs (ASPs) appears to be the best way to achieve this aim.
