Message from the Guest Editors

Dear Colleagues,

Pregnancy care through the application of screening and diagnostic methods has seen a spectacular evolution in the last decades. Fetal medicine usually requires the formation of a multidisciplinary team to evaluate the particularities of the case. Depending on the detected fetal pathology, it is essential to apply, where possible, an appropriate therapy to improve the fetal prognosis. These cases require more careful monitoring of the pregnancy and establishing the optimal moment to complete the course of the pregnancy to provide the best fetal outcomes. Information and communication with the patient and the relatives are essential in managing these cases. This Special Issue aims to offer the possibility of disseminating medical information related to this topic, thereby realizing the potential of an actual exchange of experience between specialists in perinatal medicine from all over the world. The Special Issue collects original research, manuscripts, short communications, reviews, and case reports.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
