Message from the Guest Editor

The management of trauma and fractures represents a real challenge for the health professional. It is increasingly necessary to create a multidisciplinary network that can best manage both first aid, conservative management, surgery, and rehabilitation pathways. The objective of this Special Issue is to produce scientific evidence to guide the clinic and, therefore, the management of patients after orthopedic trauma with or without subsequent fractures.

Articles that consider first access after trauma, screening for referral, and outcome measures of patients with fracture will also be considered. Scientific articles addressing the topic will be welcome for submission and will be evaluated for inclusion in this Special Issue.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
