Deadline for manuscript
submissions:

30 November 2024

Message from the Guest Editor

Burn injuries, classified into varying degrees of severity, can result from a multitude of sources, such as thermal, chemical, electrical, or even radiation exposure. These injuries not only inflict physical harm but can also have profound psychological and social repercussions.

Effective burn rehabilitation is essential to address the multifaceted nature of these injuries. Advances in burn care, such as innovative skin graft alternatives and telemedicine, continue to enhance the prospects for burn survivors, but the challenges, including high healthcare costs and the enduring impact of burns, persist.

This Special Issue aims to update the information on burn injuries and burn rehabilitation and provide new insights into innovative approaches for burn injuries and burn rehabilitation. This Special Issue welcomes all submissions related to the diagnosis and treatment of burn injuries and burn rehabilitation, including original research articles, reviews, and opinion papers.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
