Message from the Guest Editors

The purpose of this Special Issue is to provide an inside view into different ablation techniques used for the achievement of both curative and palliative goals and to introduce the basic concepts and advancements in the field. It will offer an overview of the different ablation modalities available for tumor management, focusing on advantages and future applications.

This Special Issue welcomes original articles that present experimental and clinical studies as well as reviews of the literature describing the current state of the art.

Potential topics include (but are not limited to):

- Established and advanced indications of ablative options for local tumor control
- Established and advanced palliative indications of ablative options
- The efficacy and safety of ablation in tumor management
- Simulation, navigation and verification software in ablation
- Combination therapies
- Ablation and immuno-oncology

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
