Deadline for manuscript
submissions:

closed (10 February 2022)

Message from the Guest Editor

Dear Colleagues,

Stroke is one of the leading causes of human disability, and despite the advances in reperfusion technologies, there is an increased number of stroke patients who survive with impaired functional outcomes. Development of treatment strategies that promote recovery to minimize poststroke disabilities is needed. Moreover, the introduction of algorithms that can help in the early identification of those who may be at increased risk of poor outcomes is also necessary.

This issue will focus on the advances and innovations in restorative therapies that enhance the patient's poststroke outcome, highlighting novel systems or devices and outcomes of clinical management protocols.

Articles on innovative interventions using brain stimulation, neurostimulation or new pharmacological therapies, or physical activities that promote recovery and neuroplasticity would be welcome for submission.

This issue will also be open to articles focusing on neuroimaging, neurophysiological methods (e.g., EEG and related techniques), or studies on predictive algorithms that can forecast poststroke outcomes using sophisticated machine learning techniques.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
