### Message from the Guest Editors

Dear Colleagues,

The integrated management of patients with AFib is very important, and is necessary for the consistent, guideline-adherent management of patients with the goal of improving outcomes. This approach is consistent with the Innovative Care for Chronic Conditions Framework proposed by the WHO. The integrated care of patients with newly diagnosed AFib should help to improve AFib management, such as the underuse of anticoagulation, access to rate and rhythm control therapy, selecting approaches to cardiovascular risk reduction, and the timely use of advanced non-pharmacological methods such as catheter or surgical interventions (ablation, LAA occlusion, AF surgery, etc.). Integrative AFib care requires the cooperation of primary care physicians, cardiologists, cardio surgeons, and AFib and stroke specialists.

The purpose of this Special Issue is to present and discuss the clinical matters associated with AFib and its management, with a focus on pharmacological and non-pharmacological approaches and with the inclusion of evidence-guided therapy into the integrative care of patients with AFib.

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
