### Message from the Guest Editor

Dear Colleagues,

This Special Issue will highlight and summarize the current knowledge concerning the pathogenesis of ASD (anatomical, morphostructural, molecular and biochemical alterations) and its relationship with melatonin, covering both basic and (pre)clinical aspects. Potential studies may include assessment of the endogenous melatonin patterns in ADS but, also, evaluation of the potential effect of melatonin with regard to ADS symptoms. For this Special Issue, we invite investigators to contribute with original articles as well as review articles that will describe and help in understanding the current and potential challenges surrounding “Melatonin in Autism Spectrum Disorders”.

Keywords: autism spectrum disorder; melatonin; oxidative stress; sleep quality
