closed (31 January 2021)

Message from the Guest Editor

Dear Colleagues,

This Special Issue will highlight and summarize the current knowledge concerning the pathogenesis of ASD (anatomical, morphostructural, molecular and biochemical alterations) and its relationship with melatonin, covering both basic and (pre)clinical aspects. Potential studies may include assessment of the endogenous melatonin patterns in ADS but, also, evaluation of the potential effect of melatonin with regard to ADS symptoms. For this Special Issue, we invite investigators to contribute with original articles as well as review articles that will describe and help in understanding the current and potential challenges surrounding “Melatonin in Autism Spectrum Disorders”.

Keywords: autism spectrum disorder; melatonin; oxidative stress; sleep quality

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
