Message from the Guest Editors

Mitral valve disease, the focus of this Special Issue, is one of the most common valve disorders and carries a significant burden in terms of mortality and morbidity.

This Special Issue will focus on innovative and out-of-the-box research on mitral valve disease management as well as ground-breaking points of view regarding topics that are yet to be consolidated.

We are pleased to invite colleagues to submit their original research on the topics listed below:

- New elements and tools in diagnosis of mitral valve diseases;
- Prognostic scores and biomarkers;
- Preoperative optimization (analgesia, medications, multiorgan function, blood management, functional status, nutrition);
- Minimally invasive mitral valve surgery;
- Trans-catheter mitral valve repair/replacement;
- ERACS and anesthetic choices;
- Rehabilitation.
