### Message from the Guest Editor

Dear Colleagues,

Chronic obstructive pulmonary disease (COPD) is a highly prevalent condition responsible for an enormous amount of mortality, morbidity, and cost. New approaches and data in recent years have refined the clinician's approach to caring for patients suffering from COPD. In this Special Issue, we seek to provide a series of clinically pertinent reviews in COPD intended to address controversies and recent advances in COPD using a format that engages readers by framing reviews around realistic clinical scenarios.
