Message from the Guest Editor

Dear Colleagues,

Colorectal carcinoma is one of the most common cancers and one of the leading causes of cancer-related death worldwide. Pathologic examination of biopsy, polypectomy and resection specimens is crucial for correct patient management, prognosis assessment and family counseling. Molecular testing plays an increasingly important role in the era of personalized medicine. This Special Issue will focus on the histopathology and molecular pathology of colorectal carcinoma and its precursor lesions, with an emphasis on their clinical relevance.

Dr. Audrius Dulskas
