Message from the Guest Editors

Dear Colleagues,

Cancers of the male reproductive and the urinary system are diseases of increasing prevalence, the treatment of which are undergoing a continuous process of evolution. The characteristic feature of these tumors is that in the majority they remain asymptomatic until they are locally advanced or metastasized. Many of these tumors are still a major problem for oncological urology as well as systemic oncological treatment. Therefore, the development of new technologies, surgical instruments, and surgical methods as well as the implementation of new therapies remain an unsatisfied need of modern urological oncology.

This Special Issue aims to discuss new approaches to male reproductive and urinary system cancers. We prefer original research and review papers concerning progress in Medical Developments for Male Reproductive and Urinary Cancer.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
