### Message from the Guest Editors

Dear Colleagues,

In recent years, we have witnessed breakthroughs in several gastroenterological diseases which have drastically improved our understanding of disease pathogenesis, risk factors, diagnosis, predictors of outcome, and response to treatment, contributing to improved patient management and outcomes. Gastrointestinal diseases such as inflammatory bowel disease (IBD), pancreatitis, cholangitis, pseudomembranous colitis, diverticulitis, and general helicobacter-related diseases are the focus of research to better explore the above-mentioned targets.

The aim of this Special Issue is to offer an opportunity to researchers to publish outstanding manuscripts focusing on general gastrointestinal and inflammatory disorders. Priority will be given to high-quality original articles, but well-designed, systematic reviews (with or without meta-analysis) and narrative reviews addressing the latest updated insights on a specific topic will definitely be welcomed.

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
