Message from the Guest Editor

Immuno-mediated skin diseases are a common and clinically heterogeneous group of cutaneous conditions. In recent years, there has been a significant increase in the understanding of the pathogenesis of these diseases which are often difficult to treat. The therapeutic approaches for immune-mediated skin diseases have been transformed in the past two decades. We have moved from the utilization of broad-spectrum immune modulators to the use of agents with high specificity, arising from monoclonal and molecular biotechnology and, more recently, highly targeted small molecule synthesis.

This Special Issue will focus on recent immunotherapy approaches and novel targeted therapy using bioactive small molecules for the treatment of immune-mediated skin diseases. Submissions of new research papers, reviews, commentaries and case reports are welcome to this Special Issue.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
