Deadline for manuscript submissions:
closed (10 January 2024)

Message from the Guest Editors

Aortic disorders, such as aneurysms and dissections, cause a large global health burden. Despite advances in medical understanding and imaging technology, the diagnosis and treatment of aortic illnesses continue to be challenging.

This Special Issue aims to provide a complete overview of current aortic disease research and treatment options. We encourage submissions that focus on the diagnosis, treatment, and outcomes of aortic diseases, as well as on cutting-edge research in this area.

Innovative research areas include molecular factors underlying the genesis of aortic aneurysms, innovative imaging tools for accurate diagnosis, and minimally invasive surgical techniques. We have a particular interest in publishing articles that explore disparities in the management and outcomes of aortic disease across different populations.

Scholars working in relevant areas are invited to submit studies that provide new insights into the diagnosis and management of aortic disorders in the form of original research articles, reviews, and case reports. We hope that physicians and researchers in the field of cardiovascular medicine will find this Special Issue inspiring and useful in equal measure.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.
Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
