Prof. Dr. Razvan Ilina

Department of Surgery, University of Medicine and Pharmacy “Victor Babes”, Timisoara, Romania

Deadline for manuscript submissions:

25 October 2024

Message from the Guest Editors

Gynecological diseases, both benign and malignant, represent one of the leading causes of female morbidity and mortality worldwide. The diagnosis and treatment of gynecological diseases constitute an ever-evolving topic shaped by changes in technology and scientific developments.

The aim of this Special Issue is to present the latest evidence and knowledge in this field of research with respect to the development of new diagnostic tools, advances in gynecological imaging techniques, novel procedures, operative techniques, and materials, anatomical considerations, pre- and/or postoperative management, enhanced recovery after surgery protocols, and other topics that can contribute to improvements in the current standard of care.

Manuscripts submitted should not have been published previously, nor should they be under consideration for publication in another journal. The key types of articles that will be considered are original research manuscripts, reviews, and case reports addressing the theme of benign and malignant gynecologic pathologies.
