Message from the Guest Editor

Dear Colleagues,

Laboratory tests play crucial roles in clinical diagnostic procedures and treatment decision making. Errors occurring during laboratory testing may have adverse consequences for patients, including time loss, increased costs, delays in care, and pain and suffering. The aim of this Special Issue is to highlight the wide-ranging research about the causes, status, strategies, and management of laboratory errors throughout the total laboratory testing process from the manufacturing phase to the post-analytical phase. This will play a vital role in gathering information and improving the landscape for laboratory errors, emphasizing the need for a patient-centered approach to laboratory errors.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
