### Message from the Guest Editors

Dear Colleagues,

The journal *Medicina* launched a Special Issue titled "Youth Mental Health after COVID-19 Pandemic: Prevention, Innovation and Treatment Projects in Mental Health Services".

Although physical health is understandably the priority during a pandemic, the impact of the COVID-19 pandemic and subsequent measures to protect mental health should be a major concern, particularly for adolescents, as compared to adults, the mental health of young people is often disproportionately affected by disasters.

Due to dramatic and sudden changes in their lives during the pandemic, thousands of teenagers around the world could still be at risk for psychopathological disorders, creating a mental health "pandemic" scenario. We believe they deserve an inclusive response in terms of global health measures to avert potentially serious and long-lasting effects in terms of marginalization, stigma and psychopathological developments.

The aim of this Special Issue is to receive new proposals, ideas and practices used or to be implemented for the future in order to improve the mental health of current adolescents and young adults.

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
