Message from the Guest Editors

Endometriosis is a common gynecological disease that adversely affects the health and quality of life of many women worldwide. The disease is associated with different forms of chronic or cyclic pain, as well as reduced fertility. The heterogeneity and many non-specific symptoms of the disease complicate diagnosis and can delay the onset of treatment of women with the disease. Until now, the diagnostic tools and the therapeutic options have been limited. Therefore, there is a need for new and improved diagnostic and treatment tools, developed either based on basic research into the mechanisms leading to the development of the disease, or from clinical research.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
