Coronary Syndrome: Prevention and Management

Guest Editor:

Dr. Cristian Mornos

Cardiology Department, "Victor Babes" University of Medicine and Pharmacy, 300041 Timisoara, Romania

Deadline for manuscript submissions:

closed (30 July 2024)

Message from the Guest Editor

Despite remarkable progress in recent decades, coronary artery disease still represents a major public health issue, with a huge impact in terms of mortality, morbidity and the quality of life. The exploration of new risk factors may contribute to medical management and health care. Circulating biomarkers involved in the pathogenesis of coronary artery disease have the potential to detect the disease at early stages: biochemical (proteins), inflammatory, epigenetic (ncRNA, miRNA) and transcriptional markers (gene expression). In parallel, new imaging diagnostic tools are being developed to allow for less invasive and more widely applicable diagnoses. Nowadays, imaging is rapidly evolving. We want to understand diagnostic decisions, derive treatment-guiding and prognostic information, and assess treatment responses from primary prevention and pharmacotherapy to invasive management. We aim to offer readers a snapshot of the latest advances in the field and overview the most intriguing challenges ahead and expected developments that may impact our daily clinical practice.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
