### Message from the Guest Editor

Dear Colleagues,

Lately, there has been increased interest in understanding the connections that might exist between most neuropsychiatric disorders and their associated digestive dysfunctions. Oxidative stress might represent one important communal aspect in the pathophysiology of these two types of disorders. We invite researchers to submit original research, review articles, or clinical data focused on recent advances on the main topics described below.

- Oxidative stress in the context of gut microbiota vs. most neuropsychiatric disorders
- The oxidative stress-related connections between irritable bowel syndrome and its psychiatric comorbidities
- Redox metabolism and inflammation in other functional digestive disorders and their associated neuropsychiatric manifestations
- Oxidative stress and neuropsychiatric manifestations in hepatic encephalopathy
- Neurological complications and oxidative stress in inflammatory bowel disease
- Oxidative stress modifications in the context of diet relevance in autism or ADHD
- Antioxidant compounds with promising effects on the central and digestive level

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
