Message from the Guest Editor

Dear Colleagues,

The aim and scope of this Special Issue is to cover the development of innovative treatment approaches to head and neck squamous cell carcinoma (HNSCC) with multidisciplinary management, with the goal of improving HNSCC patients' clinical outcomes.

The specific topics that we are interested in are:

- Precision medicine, i.e., targeted therapies in HNSCC
- Innovative techniques, i.e., surgery, imaging, artificial intelligence, etc., that involves a multidisciplinary treatment paradigm for HNSCC patients
- Biomarkers that could assist in the stratification of responders and non-responders to clinical management of HNSCC.

This Special Issue of *Medicina*, entitled *Head and Neck Oncology: From Precise Surgery to Precision Medicine and Surgery*, welcomes the submission of original articles, review articles, systematic reviews, and meta-analyses related to precision surgery and precision medicine, as well as biomarkers related to HNSCC treatment outcomes after chemotherapy/chemoradiotherapy/ICI. This Special Issue also invites new experimental clinical results related to HNSCC.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
