Message from the Guest Editor

Dear Colleagues,

Medicina is currently receiving manuscripts for a Special Issue on palliative care screening and assessment in the emergency department. The Special Issue will include manuscripts on variables related to palliative care in emergency departments (ER).

According to the World Health Organization (WHO), 40 million people need palliative care every year. These cares prevent and alleviate suffering through early identification, the correct treatment of pain, and other related problems. Patients who most need palliative care have chronic diseases and often go to the ER frequently. Normally, these patients suffer exacerbations of their disease, complications, or need pain relief. In fact, professionals must be trained in palliative care to improve the quality of life of these patients. Therefore, analyzing different variables related to the admission of these patients in the ER is important to be able to treat them efficiently.

We welcome studies using quantitative, qualitative, or mixed methods, with primary or secondary data. All articles are subject to peer review to ensure quality publications.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
