closed (30 June 2021)

Message from the Guest Editor

Dear Colleagues,

Chinese health authorities reported a cluster of pneumonia cases of unknown aetiology in the city of Wuhan, Hubei province in December 2019. The WHO declared the international SARS-CoV-2 outbreak a Public Health Emergency of International Concern. It is necessary to better characterize the virus in terms of structure, life cycle, tropism, genetic evolution, pathogenetic mechanisms, and associated pathologies. At the same time, it seems necessary to develop novel therapeutic approaches and rationale, and possibly antiviral compounds and vaccines. All researchers working in the fields of human viral infections and antiviral drugs are cordially invited to contribute original research papers or reviews to this Special Issue of *Medicina.*

Prof. Dr. Stefano Aquaro

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.
Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
