Message from the Guest Editors

Dear Colleagues,

Glomerulonephritis is one of the major causes leading to end-stage kidney disease. Many advances have been made for delaying the progression of glomerulonephritis over the last decade. These include the development of efficient diagnostic tools, the implementation of patient-centered clinical trials, and the exploration of novel therapeutic regimens or agents. Despite this progress, many clinical questions remain inconclusive. We still have not critically evaluated some proposed guidelines or recommendations despite emerging evidence to challenge current paradigms and discrepant patient-preferred outcomes.

We are pleased to invite you to contribute to this Special Issue by submitting clinical research articles or reviews in glomerulonephritis investigating outcome prediction equations and exploring how to ensure early and precise diagnosis, develop better diagnostic tools or disease markers, and implement best practices. We also welcome authors to submit papers relating to clinical issues in the fields of other glomerular diseases. We look forward to receiving your contributions.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
