Message from the Guest Editor

During the past two decades or so, dramatic demographic and socio-cultural modifications have influenced the epidemiology of pediatric fractures. The appearance of new leisure devices have led to a further evolution in the daily practices of the paediatric. At the same time, management options have evolved due to improved surgical knowledge and technical advances. In particular, the appearance of new operating techniques (Elastic Stable Intramedullary Nailing, for example), as well as the use of new materials (bio-absorbable materials, for example) are revolutionizing the treatment of pediatric fractures.

This Special Issue will share the experience of world-leading pediatric orthopedic surgeons through original research articles, formal systematic literature reviews, and case presentations.

Authors are welcomed to submit manuscripts on specific pediatric fractures that discuss important advancements in management and/or and novel surgical interventions.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
