Message from the Guest Editor

Dear Colleagues,

Diagnostic and therapeutic approaches for biliary diseases have significantly improved in recent years. Endoscopic ultrasound (EUS) has led to a minimally invasive approach for the diagnosis of both benign, such as lithiasis, and malignant conditions, such as cholangiocarcinoma. Minimally invasive approaches, such as ERCP or more recently interventional EUS, have significantly modified patients' outcomes and their quality of life. Surgical approaches have also improved in recent years especially the minimally invasive approach for gallbladder diseases. The aim of this Special Issue is to publish original research articles, literature reviews, case reports, and case series on the diagnostic and therapeutic approaches for biliary diseases from both the endoscopic and surgical points of view.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
