Message from the Guest Editor

Dear Colleagues,

Type 2 diabetes has reached epidemic proportions worldwide and is projected to afflict more than 300 million individuals by the year 2025. Insulin resistance is the hallmark of type 2 diabetes and represents a pivotal metabolic defect in its pathogenesis. Given the importance of insulin resistance as a critical pathogenic factor leading to type 2 diabetes, the journal *Medicina* is launching a Special Issue entitled “Type 2 Diabetes and Insulin Resistance” with the aim of gathering together accurate and up-to-date scientific information on all aspects of insulin resistance and type 2 diabetes. We are pleased to invite you and your co-workers to submit your original research articles reporting on the biochemical and molecular aspects of insulin resistance including the pathophysiological mechanisms underpinning its development. We also encourage the submission of original manuscripts spanning basic to clinical research and focusing on dietary, lifestyle, and pharmacological interventions to prevent and/or ameliorate insulin resistance.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
