Message from the Guest Editor

Dear Colleagues,

I am delighted to present a Special Issue on the topic of “Advances in Cornea, Cataract and Refractive Surgery

The latest technological developments and advanced surgical techniques have radically changed the daily practice of eye surgeons, with new treatment options making surgery safer, faster, and more precise. The advent of new diagnostic tools especially in the anterior segment enables better patient management and precise monitoring of disease progression, leading to an improvement of postoperative surgical outcomes.

This Special Issue is a multidisciplinary forum on the role of diagnostic and surgical procedures in this subfield of ophthalmology.

The published papers will describe new developments in these areas. This Special Issue accepts high-quality articles containing original research results, as well as review articles of exceptional merit.

Dr. Ivo Guber
