### Message from the Guest Editors

Dear Colleagues,

The daily clinical use of heparins, vitamin K antagonists, and direct oral anticoagulants in the management of difficult clinical situations such as assisted reproductive technologies, antiphospholipid syndrome, SARS-CoV-2 infection, renal failure, venous thrombosis in unusual sites, and isolated distal deep vein thrombosis is often challenging. What is needed is to give helpful suggestions in managing such patients from a practical point of view, even when there are no so clear evidence-based recommendations about treatment.

It is well known that both in- and outpatients often show clinical characteristics and comorbidities that have been excluded from all randomized clinical trials, but despite this, such patients need a final therapeutic decision.

This Special Issue of *Medicina* on “Anticoagulant Therapies in particular clinical conditions”, showing gray areas of the topics cited above, has the aim to help doctors in their daily clinical practice.

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
