Deadline for manuscript submissions:

closed (30 March 2021)

Message from the Guest Editors

Dear Colleagues,

Bipolar disorder (BD) is a chronic and severe psychiatric illness. It is reported as responsible for the loss of more disability-adjusted life-years than all forms of cancer and major neurological conditions. Despite the serious burden on patients and the health system, many aspects of its pathobiology remain unclear. In recent years, research has provided impressive progresses in many areas of BD.

The aim of this Special Issue is to invite researchers to contribute in broadening the current knowledge in genetics, proteomics, neuroimaging, biochemical physiopathology, neuropathology, biopsychosocial interactions, precise psychiatry, and innovative treatments in the field of BD. Particular attention is devoted to high-risk subjects and mixed states.

- bipolar disorder
- lithium
- psychopharmacology
- sleep disturbance
- high risk
- neuroimaging
- genetic
- circadian rhythm

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed,

MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General

Medicine)
