Deadline for manuscript submissions:

closed (10 May 2022)

Message from the Guest Editors

Dear Colleagues,

Venous thromboembolism (VTE) is a disorder that includes deep vein thrombosis and pulmonary embolism. Currently, VTE is the third most common vascular event and a leading cause of death worldwide. There has been a significant effort in recent years to improve decision-making in VTE patients' care, but due to its multifactorial and heterogenous nature, different standards apply in everyday clinical practice that frequently incorporate individualized approaches and habitual practices.

The goal of the current Special Issue is to collect information that may provide the appropriate means for establishing effective decision making in VTE patients. We warmly invite you and your colleagues to submit original research articles, reviews, systematic reviews, and meta-analyses that address issues related to VTE risk factors, risk assessment, diagnosis, treatment, prognosis, follow-up, monitoring, and prevention.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
