Message from the Guest Editor

Dear Colleagues,

The body's functioning is designed for movement, and to a large extent, health depends on the amount of movement one makes throughout one's life. In recent years, muscle has gone from being regarded simply as an executor of the commands of the motor nervous system to being recognized as an important endocrine organ, regulating metabolic, immune and cognitive function. The intensity, frequency and mode of muscle exercise have different effects on organs, physiological systems and health. The study of the physiological effects of resistance exercise and its application in rehabilitation is emerging with unusual interest.

Gathering research on these topics in a Special Issue will help to make the studies more referenced and have a greater impact. We look forward to receiving your submissions.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
