Medicine Division of Radiology,  
University of Campania 'Luigi  
Vanvitelli', 80131 Naples, Italy

Deadline for manuscript  
submissions:

**closed (1 September 2021)**

### Message from the Guest Editors

Dear Colleagues,

In this Special Issue, we would like to enhance the role of detection and characterization, but also of post-therapy follow-up in the era of personalized medicine. Deep neural networks can help experts in diagnosis and decision-making.

Artificial Intelligence, thanks to deep learning, has revolutionized the fields of medicine with predictive analysis and computer-aided diagnosis and characterization.

The analysis and integration of data allows a personalized therapy with better results, as shown by imaging in follow-up procedures.

We encourage multidisciplinary original research contributions or review to enhance personalized patient management strategies. Pictorial essays or letters to the editor focused on these topics are also welcome.

Prof. Anna Capasso  
Dr. Graziella Di Grezia  
Dr. Gianluca Gatta

## Editor-in-Chief

### **Prof. Dr. Edgaras Stankevičius**

Medical Academy, Lithuanian  
University of Health Sciences,  
Kaunas, Lithuania

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
