Bio- and Osseointegration in Dentistry

Guest Editor:

Dr. Kinga Turzó
Dental School Pécs, Medical
Faculty, University of Pécs, 7621
Pécs, Hungary

Deadline for manuscript
submissions:
closed (30 November 2021)

Message from the Guest Editor

With the increase in human lifetimes, the need for biomaterials replacing parts of the human body or organs is increasing. Therefore, the study of the biointegration of alloplastic materials and development of biocompatible materials is one of the most important research fields in biomedical sciences. The goal of dentistry is to maintain and improve the health of human teeth and oral cavities in order to improve the life quality of the patient. All these activities require the replacement or alteration of existing tooth structure and hard and soft tissues. For example, dental implants are one of the most frequent and successful biomaterials, as dentistry responded well to the main challenges of developing and selecting biocompatible prosthetic materials that can withstand the adverse conditions of the oral environment (for, e.g., abrasion, pH, temperatures, high magnitude masticatory forces, or bacteria). This Special Issue aims to collect updates on the bio- and osseointegration phenomena of biomaterials used in dentistry, based on evidence from biological surface science and the *in vitro* and *in vivo* studies of the applied biomaterials.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian
University of Health Sciences,
Kaunas, Lithuania

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
