Deadline for manuscript submissions:

closed (31 December 2021)

Message from the Guest Editors

The technological leap in recent decades has enabled more intense research in the field of prenatal medicine. This progress has made it possible to capitalize on the creativity of human resources in more and more regions of the world. The development of databases at national and international levels, digitization, and the increase of the remote communication capacity through faster transfer of large volumes of information have facilitated the collaboration and the performance of multicenter studies. All this ultimately translates into a better understanding of the pathophysiological mechanisms and the development of new screening and treatment protocols. Despite all the progress made, a large part of the world's population and the doctors who care for pregnant women carry out their lives and work in precarious conditions.

The purpose of this Special Issue is to provide authors around the world with the opportunity to publicize cutting-edge research results as well as aspects of epidemiology and particularities of antenatal care in the field of antenatal medicine, specific to various regions of the world.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
