### Message from the Guest Editors

Dear Colleagues,

The field of pulmonary hypertension is rapidly progressing. With the most recent changes to the classification and definition of pulmonary hypertension and its subtypes and new knowledge for optimal diagnosis and treatment of infants, children, and young adults with pulmonary hypertension (including CHD/Eisenmenger and single ventricle physiology/Fontan), since the publication of 2015 pulmonary hypertension guideline in children by AHA, there is a need to update and discuss the challenging issues inherent to pediatric pulmonary hypertension.

This special issue of *Medicina* will act as a forum to increase understanding of pulmonary hypertension in children, by sharing knowledge about incompletely understood and controversial aspects.

Both original research articles and literature reviews will be considered for publication.

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
