Boundaries Between Oral and General Health

Message from the Guest Editor

A large body of evidence demonstrating interactions between oral health and general health has been accumulated over the years. The oral manifestations of different systemic diseases, metabolic or psychosomatic disorders are well recognized, however, the mechanisms and pathways of some of the links are not always clear. In many cases, this relationship is bidirectional: the improved oral health has a positive effect on the patient's general wellbeing, and vice versa. Aging of the contemporary populations brings up new challenges for the dental profession as it is inevitably associated with increasing number of age-related morbidities and consequently, requires more insight into various areas of the oral and general health relationship. Thus, this Special Issue is dedicated to publishing new and significant findings in all areas of dentistry that may contribute to improvement of the oral/general health care as well as provide evidence on the connections based on experimental or, clinical studies. Research articles, review articles as well as short communications or, case reports are invited. Prof. Dr. Vita Maciulskiene

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
