Future Trends in Breast Cancer Management

Message from the Guest Editor

Breast cancer is one of the most common adult cancers worldwide with more than 2.3 million cases of breast cancer occurring each year. The management of breast cancer is a quickly changing field. The adoption of newer technologies and quality research has helped better diagnosis, prognostication, and treatments. In addition, there have been advancements in the availability of wider targeted therapies to treat breast cancer with improved outcomes. Ongoing research in various fields and a better understanding of this heterogeneous disease is helping to adopt various de-escalation treatment settings. Further research into various subsets of breast cancer patients would be of interest. such as Her2-low breast cancer patients and treatment outcomes with various antibody drug conjugates. Artificial intelligence and digital technology will significantly influence the management of breast cancer in the future. This may be of great help to achieve a consistent improved cancer survival with better patient outcomes being reported across the globe. Advancements in radiomics may enable us to decipher the histological nature of the disease without invasive tissue biopsies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
